LUTRO b+m Service GmbH – Customer Service for LUTRO Paint Systems

The customer service for LUTRO paint systems is being restructured with b+m surface systems as a partner. After the insolvency of LUTRO Luft- und Trockentechnik GmbH in April, the service team was transferred to b+m surface systems GmbH. The well-known LUTRO customer and equipment service is now provided by LUTRO b+m Service GmbH.

The reliable service team both in the office and in the field, as well as the on-site service technicians, will continue to be available as a competent partner for LUTRO painting systems in the future.

b+m surface systems GmbH, headquartered in Eiterfeld in eastern Hesse, is one of the leading technical manufacturers of fully automatic painting systems. The owner-run company employs about 450 people worldwide and develops and manufactures key components such as painting robots, application technology, and automation itself. Nationwide service offices in Germany and six international sales and service subsidiaries will be strengthened by the LUTRO customer service from now on.

The entire LUTRO service team with all its tools and documents has been transferred to the new company. This means their strengths in service support, spare parts supply, as well as all technical aspects will be maintained for the customers.

The employees are experts in painting systems and aim to continue providing competent support for the many LUTRO customers.
